

“Don’t Interrupt Me”

A Large-Scale Study of
On-Device Permission Prompt Quieting in Chrome

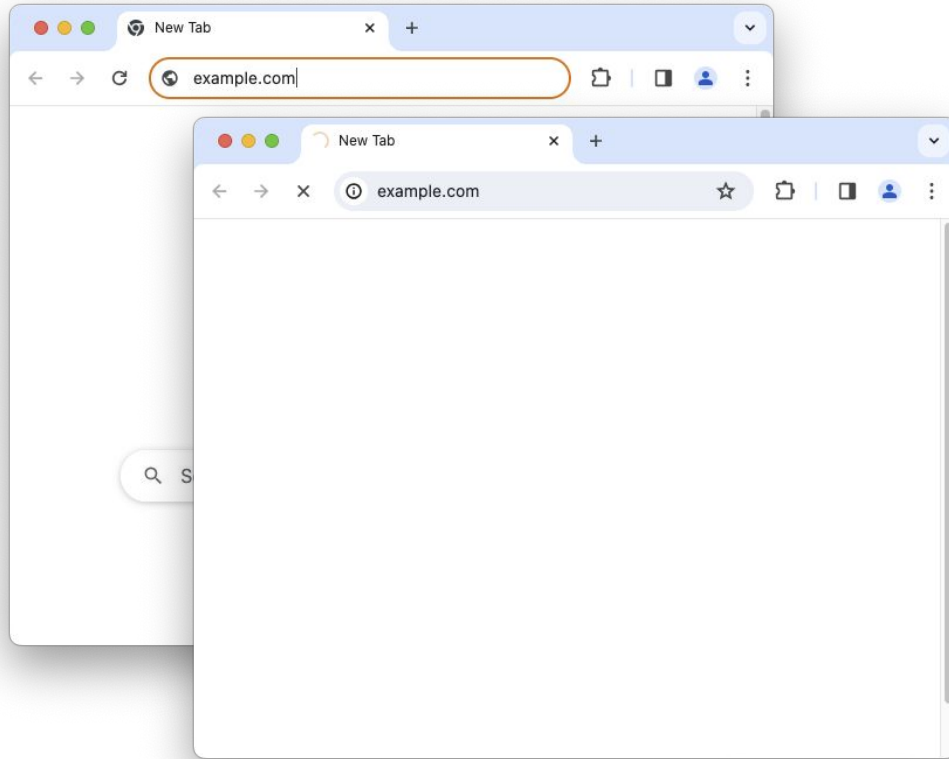

Marian Harbach, Igor Bilogrevic, Enrico Bacis, Serena Chen, Ravjit Uppal,
Andy Paicu, Elias Klim, Meggyn Watkins, and Balazs Engedy

ML-based Activation

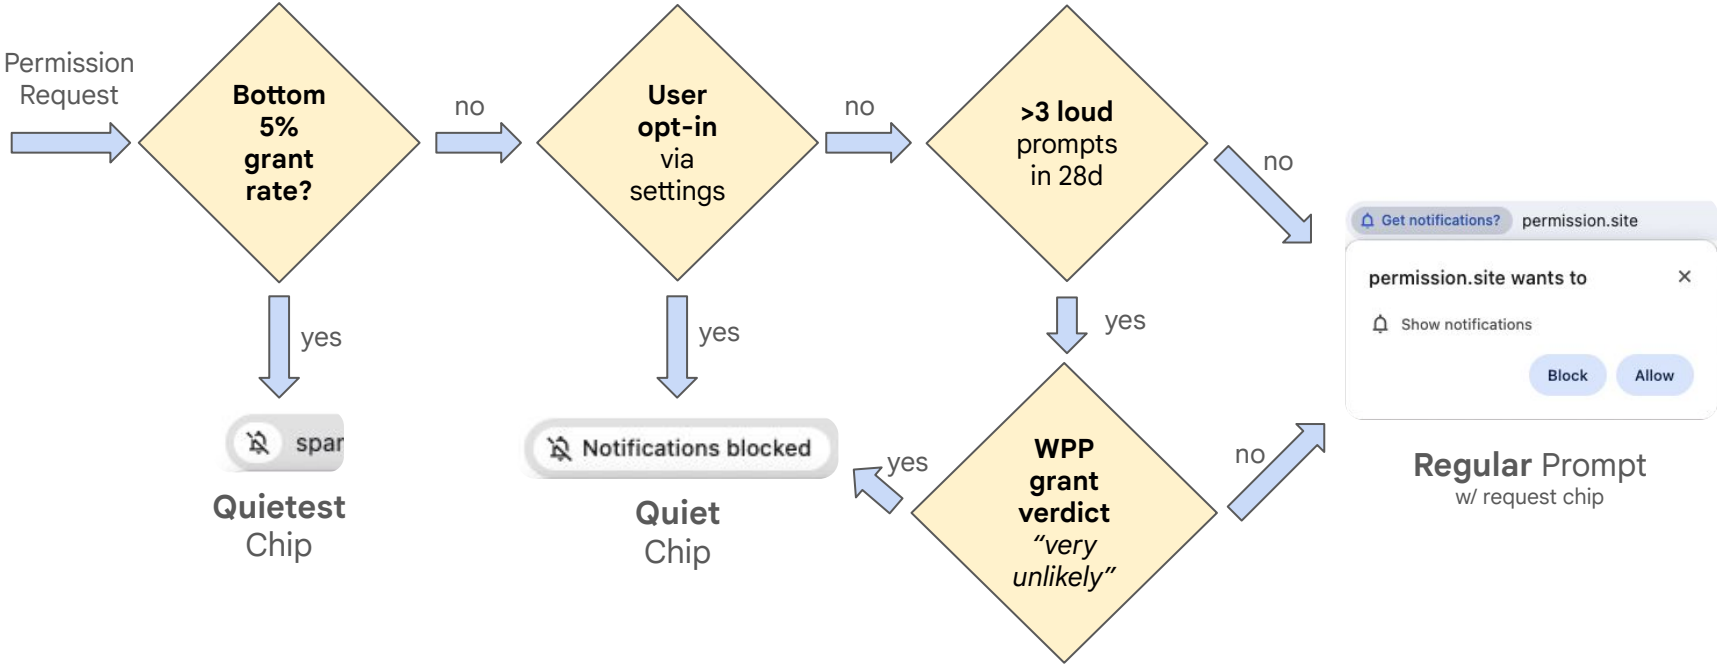

Web Permissions Predictions (WPP)

Features used for training:

- Permission type
- 28d average action rates across all permissions
- 28d average per-permission action rates
- 28d number of loud permission prompts
- User gesture prior to prompt?
- Desktop vs. mobile

Decision Logic

Improved quieting efficacy

Metric	Notifications Permission	Geolocation Permission
# of prompts	> 10 million	> 10 million
% of prompts for which WPP was the UI selector	43%	24%
% of quieted prompts (over all prompts for which WPP was the UI selector)	96%	81%
Post-hoc precision	99%	99%
Post-hoc recall	96%	83%

Improved quieting efficacy

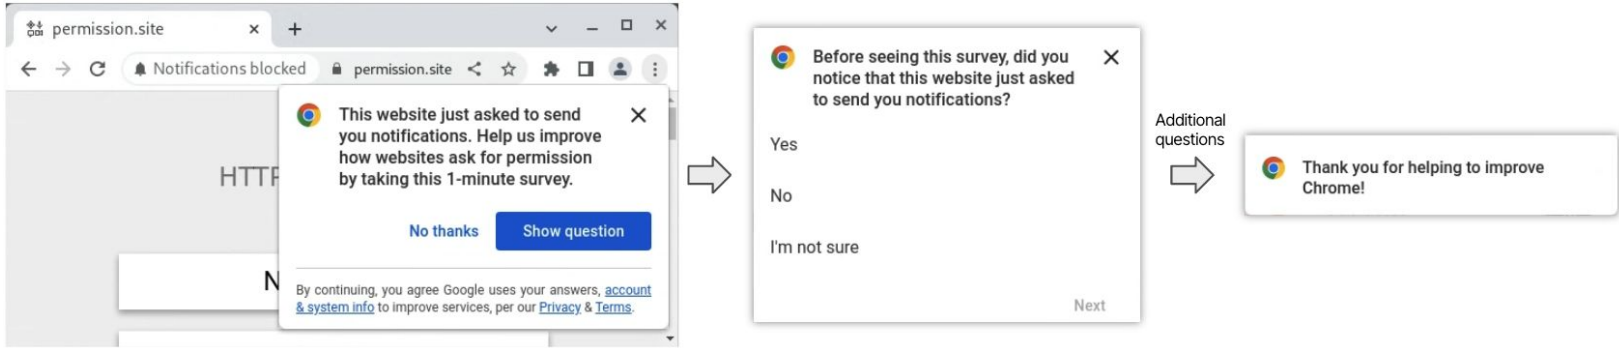

Metric	Notifications Permission	Geolocation Permission
# of prompts	> 10 million	> 10 million
% of prompts for which WPP was the UI selector	43%	24%
% of quieted prompts (over all prompts for which WPP was the UI selector)	96%	81%
Post-hoc precision	99%	99%
Post-hoc recall	96%	83%

Improved quieting efficacy

Metric	Notifications Permission	Geolocation Permission
# of prompts	> 10 million	> 10 million
% of prompts for which WPP was the UI selector	43%	24%
% of quieted prompts (over all prompts for which WPP was the UI selector)	96%	81%
Post-hoc precision	99%	99%
Post-hoc recall	96%	83%

User Experience

Method

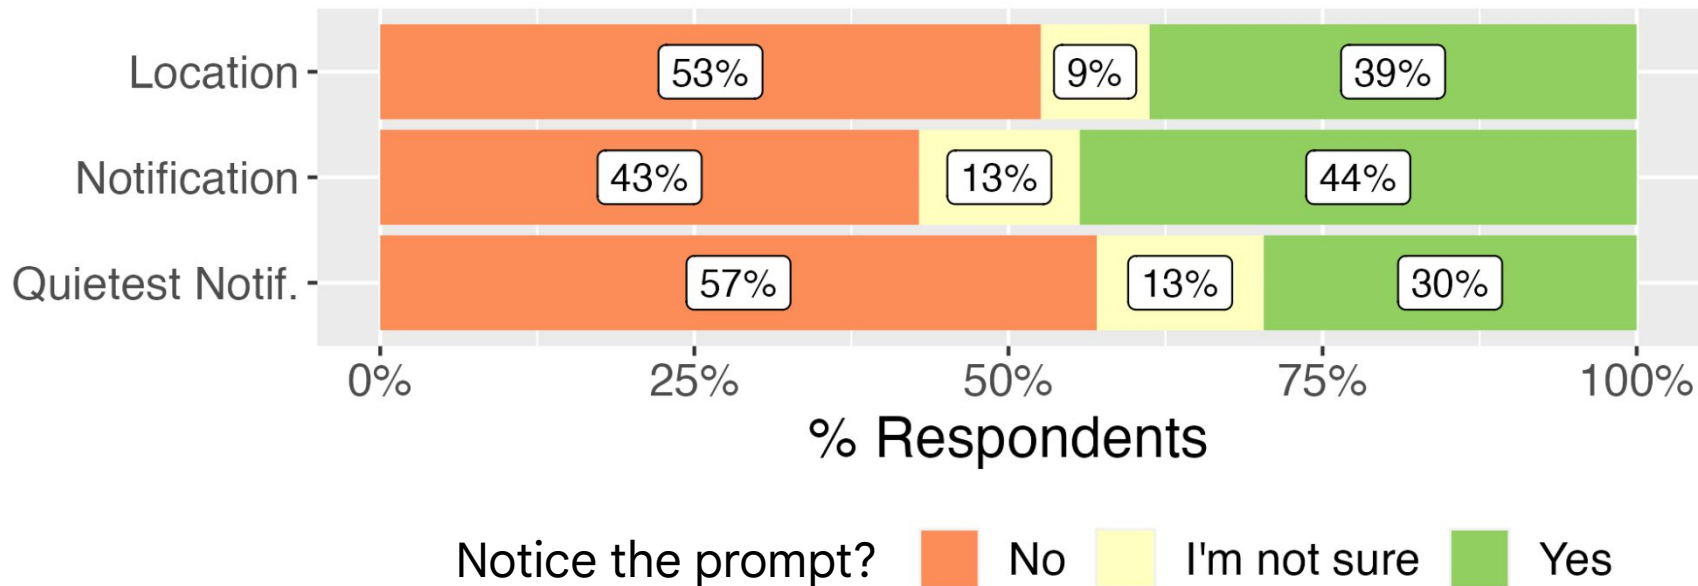

➡ 2.9M survey invitations shown

➡ 13,109 complete responses

➡ 7 languages, 156 countries, 66s median response time

➡ Caveat: self-selection bias

How noticeable is the chip?

Q: Before seeing this survey, did you notice that this website asked to [send you notifications / see your location]?

How helpful is prompt quieting?

Helpful ■ not at all ■ somewhat ■ moderately ■ very ■ extremely

Q: Chrome automatically blocked this website's request, [based on your past choices / because most people block it or notifications from this site may be disruptive].
How helpful do you find Chrome's action?

Why do respondents feel uneasy about quieting?

Reason Category	Example	Geolocation	Notification	Quietest Notif.	Total
Want more control	<i>should ask first, make recommendation instead, feels like censorship</i>	51 (29%)	47 (19%)	41 (24%)	139 (23%)
Unsure what is happening	<i>general confusion / want to know more</i>	20 (11%)	28 (11%)	15 (9%)	63 (11%)
Inappropriate blocking in this case	<i>doesn't make sense on the this site, can't be perfect</i>	11 (6%)	33 (13%)	14 (8%)	58 (10%)
Fear of missing out	<i>afraid to miss something, may change their mind</i>	10 (6%)	25 (10%)	12 (7%)	47 (8%)
Privacy	<i>Chrome knows too much</i>	10 (6%)	18 (7%)	9 (5%)	37 (6%)
Concerned about malware/hackers	<i>site is not safe</i>	6 (3%)	16 (7%)	1 (1%)	23 (4%)
Unclear or off topic		29 (17%)	40 (16%)	34 (20%)	103 (17%)
No concern/probably OK		13 (7%)	18 (7%)	26 (15%)	57 (10%)
Answered unease question in reverse		8 (5%)	6 (2%)	4 (2%)	18 (3%)
Total		175	246	173	594

Q: Please briefly describe what makes you feel uneasy about Chrome blocking requests [based on your past choices / that most people block or because notifications from the site may be disruptive].

Why do respondents feel uneasy about quieting?

Reason Category	Example	Geolocation	Notification	Quietest Notif.	Total
Want more control	<i>should ask first, make recommendation instead, feels like censorship</i>	51 (29%)	47 (19%)	41 (24%)	139 (23%)

Q: Please briefly describe what makes you feel uneasy about Chrome blocking requests [based on your past choices / that most people block or because notifications from the site may be disruptive].

Upcoming improvements

- Reduced false positive rate by adding per-site signals to the WPP model
- Change the string in the chip to increase perceived control

Summary

- ➔ ML-based activation **increases the reach and efficacy** of prompt quieting.
This will reduce interruptions and prompt blindness.
- ➔ Most respondents **found quieting helpful** while identifying room for improvement.

Additional findings in the paper

- ➔ Mental model of why Chrome quiets prompts
- ➔ Subjective false positive rates
- ➔ Override efficacy

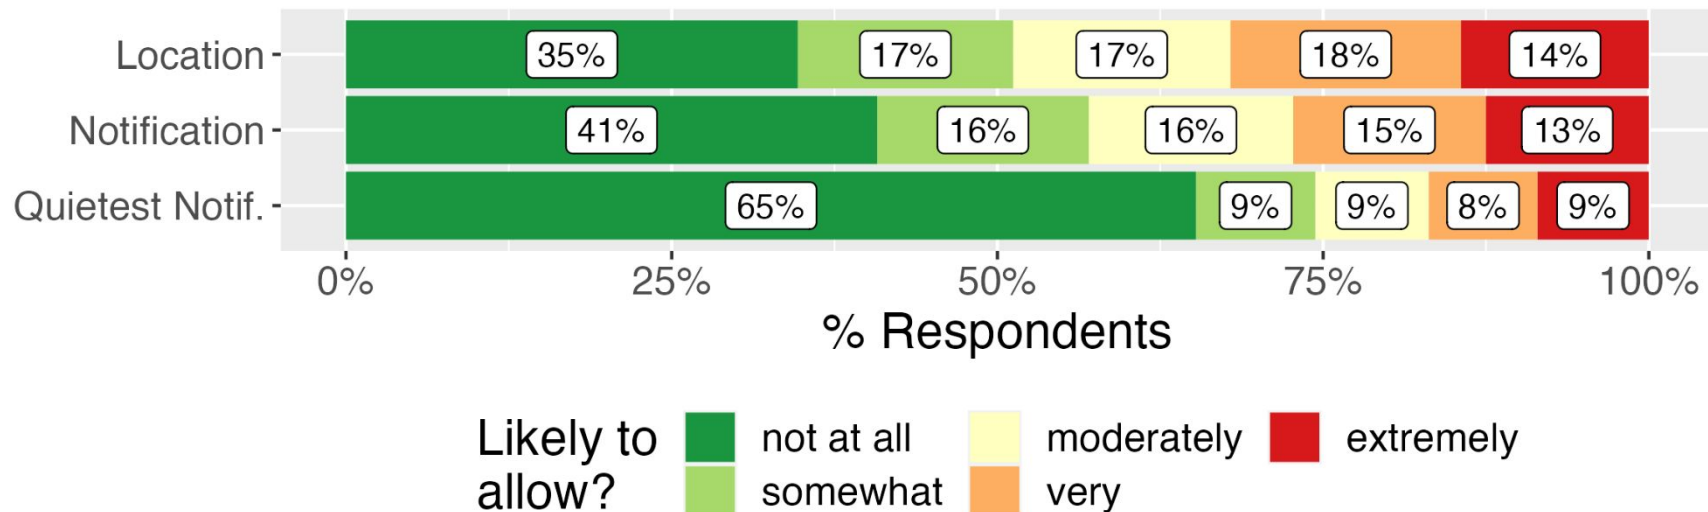

Appendix

Quieting mental model

Reason	Geolocation	Notif.	Quietest Notif.	Total
Chrome thinks that this website is dangerous	15.1%	13.4%	14.9%	14.4%
Chrome thinks that I'm not interested in this website	4.2%	8.0%	9.7%	7.3%
I don't know	50.0%	46.3%	40.1%	45.5%
Previously denied request	16.2%	17.9%	19.0%	17.7%
Told Chrome to block website	9.4%	10.4%	12.6%	10.8%
Other	3.6%	2.1%	2.4%	2.7%
This website has a technical issue	1.6%	2.0%	1.3%	1.6%

Q: This website was blocked from \$request_type. Why do you think that is?

Subjective false positives

Q: How likely are you to want to allow this website to \$request_type?

Override efficacy
